MINING, BUSINESS AND STOCKS

MILLER TALKS ABOUT DOUGLAS

Sold Yerrington Copper Property to Walter C. Orem and Associates of This City.

SHIPPED 1600 TONS LAST YEAR

The Whole Averaging 13 Per Cent Copper-Rich Ore From the Ludwig Mine.

That veteran mining man, H. E. Miller of Bellevue, Ida., who, until a few weeks ago, was the principal owner of the Douglas group of copper claims. near Yerrington, Nev., passed through the city yesterday on his way home after an absence of over nine months. It was with Mr. Miller that Walter

C. Orem of the Orem syndicate dealt when the acquisition of the Douglas property was accomplished, and which has formed the nucleus for the forma-tion of what is to be one of the most formidable copper mining enterprises n the state to the west.

The Nevada Copper company has been launched to carry on the work of levelopment and equipment. In speaking of the efforts of this company in this direction, Mr. Miller says the management has begun a most systemati-

Of the property, he says, it is the most attractive copper proposition with which he has ever been connected, and be has been associated with some pret-ty good ones. It was he who sold the Bluestone mine in the same camp to Captain Delamar in which a vein 300 feet in width, has been thoroughly de-veloped to the depth of 300 feet.

Mr. Miller relates that from the Douglas during the last year, he shipped 1,600 tons of ore, nearly all of which came to the United States smeler at Bingham Junction for treatment, and that the average of the whole was 13 per cent copper. One thousand tons of this lot, so he was told by T. R. ones, manager of the ore purchasing separtment of the smelting company, was the best lot of copper ore that had been received at the United States plant since his connection with it, being praclically self fluxing. One shoot in the Douglas mine, out of which a good por-tion of this ore was taken, has been spened for the length of 270 feet and 40 teet in width, while nowhere has a depth of to exceed 100 feet been at-mained; at least not before the present sompany undertook the development of the property. The mine can be opened idvantageously by means of tunnels, giving a stoping back of from 500 to

The Ludwig mine, adjoining the Douglas, Mr. Miller says, is shipping tegularly about 290 tons per month of copper ore that averages about 26 per While this may seem almost redible to some, nevertheless the smeler returns are proof of this, and Mr.

The Yerrington country is booming since the advent of the big companies into that region, and the future certainy looks bright for it.

JUNE ON THE EXCHANGE. Kearly \$900,000 Worth of Mining Stock Sold During This Month.

With the close of today's calls of the with the close of today's calls of the sait Lake Stock & Mining exchange, mded business for the month of June. A total of 992,777 shares were transferred, for which was paid \$799,971.57. While this is quite a little under the second made during May, it is a desided with the said of ided gain over June, 1905, when 535,916 thares were sold for \$155,156.59. The week passed with the volume of sales reported at 183,930 shares, the same elling for \$129,644.75. Trading has not been very brisk this

week as the foregoing figures will inlicate and some stocks have suffered juite a shrinkage; scarcely any of them naking gains. But the week before he Fourth is generally a quiet one, is investors are more interested in seeking some pleasure resort than they ire in stock trading. In other words racation time has come and the market s likely to be slow for several weeks. But now is a good time to buy; while tocks are more or less depressed.

Lower Mammoth has made some

reins this week due to developments on the lower levels. Daly Judge has held Tel. Bell 782. tood order; but there has been only a imited amount of buying done. At the mire, however, conditions have bever been quite as satisfactory as they are now. Thompson has lost ground. Those who have been led to believe that levelopment work would be resumed soon are going to be disappointed, as it has been given out that it may be several weeks, perhaps months, before

inything is done.

MILL FOR MONTANA.

Tonopah Mine to be Equipped With a 50-Ton Plant. At a recent meeting of the direc-

tors of the Montana-Tonopah mine it was decided to erect a reduction plant of 50 tons daily capacity. Just what the process will be will not be definitely decided until the completion of a final test that will be made in Denver

final test that will be made in Denver on 20 tons of ore that was shipped this month, says the Sun of Goldfield.

Manager Kirby is quoted as saying:
"It is a little early to say anything of our plans as we have not as yet decided ourselves what process we will use. We shipped 10 tons of high grade and 10 tons of low grade ore this morning to Denvey for a final test. is morning to Denver for a final tes which will enable us to decide on the process that will be used. The plant whatever its nature may be will be erected below the dump on the north and will have a capacity of 50 tons of ore s. day."

ore a day."
The Montana-Tonopah mine has long been under an energetic man-agement and development has been carried on in a thorough and progres. sive manner. Immense bodies of are blocked out in the mine ready for stoping and the erection of the new gallows frame and hoisting plant will enable the mine to be worked in the most satisfactory and economical man-

BUTTE CASE SETTLED.

Tom Hinds and Boston and Montana

Company Reach Understanding. Butte, Mont., June 30 .- In the district yesterday the famous claim of m Hinds against the Boston and entana Mining company for services as receiver of the properties of the company for four days, many years ago, was settled, and the application of Hinds for an allowance of fees disnissed by stipulation. Hinds and the nining company had reached a settlenent out of court, and the dismissal f the application in court was merely inging down the curtain upon the

Hinds was once allowed \$200,000 by Judge Clancy for his four days' legal service. The supreme court reversed the order. What he got in the settlement has not been made public. Each party will pay its costs.

The case of Forester and MacGinniss dates back for several years, as does the amplication of Hinds for fear

does the application of Hinds for fees as receiver, and by the action in court the latter interesting feature of the case is permanently settled.

SCRANTON WILL PAY DIVIDEND

Another Tintic District Producer That Has Been Making an Enviable Record.

DISTRIBUTION IN

Mine a Shipper of Zine and Lead Ore-Control is Held in Scranton Pennsylvania.

The Tintle mining district will soon come to the front with another dividend payer added to its already brilliant galaxy of celebrities. The date of this event has not been definitely determined: but July will probably witness the initial distribution, in which shareholders of the Scranton Mining company are to participate. The property belonging to this con-

cern is located about 10 miles north of Eureka. In days gone by, it was known among Tinticites as the Tiernan group; although the present owners have had possession for a little over six years and have been carrying on a noiseless, but vigorous campaign of de velopment ever since, there are a great many who do not know the property its present name and are somewhat surprised when told that it has been a regular shipper for some time past; that the underground workings show others have been led to believe that it is purely a zinc mine. This is not the case. Nevertheless it does contain the case. Nevertheless it does contain some extensive bodies of ore in which this metal predominates. The fact is, the Scranton might be called two mines instead of one, for it has two veins; one of them containing a preponderance of zinc, but no lead; while the order is reversed in the case of the other. This condition is so up. the other. This condition is so un-usual, particularly in the Tintic dis-

trict, that there is no getting around the fact that the Scranton belongs to a class distinctly by itself. Both the zinc and lead ores carry an excess of W. H. Bramel, the well known attorney, is secretary of the Scranton company and from him the "News" has secured some interesting facts concern-ing the past history of the property, and what he relates goes to show that even some mining engineers, who stand high in their profession, sometimes make nistakes and fail in making geological interpretation of conditions.

The control of the Scranton company passed into the hands of Theodore G.

Wolf, a wealthy Scranton, Pa., business man, in 1990, and shortly after the transfer of the property, he employed engineers to examine it. Everyone of these men made an adverse report, ex-cepting Newton A. Dunyon, Mr. Wolf decided finally to act on the sugges-tions of Mr. Dunyon and organized the Scranton company with a capital stock of 39,000 shares, and installed Mr. Dunwas instituted, and, as stated, has con-The present output of the Scranton mine is very close to 40 tons per day of shipping ore, all of which is remov-

ed in the course of development; no stoping having been started. The ore nets a good profit, and the earnings at the present time a e sufficient to jus-tify the payment of at least 25 cents a share in dividends, monthly, which would be \$7,500.

The mine has been developed through a tunnel. At the present time the com-pany has 35 men on its payrolls and has eight teams employed in moving ore from the mine to Del Monte, the nearshipping point on the tracks of the San Pedro, Los Angeles & Salt Lake railroad, five miles away. The Scran-ton owns about 20 claims, all of which are patented. There are no other de veloped mines in this portion of the district. The mine is equipped with a compressor and other power machinery.

TINTIC ORE SHIPMENTS.

Juab County Mines Sent Out 130 Carloads This Week.

The ore shipments from the Tintic mining district this week aggregated 130 carloads, which is a little under the average. The Gemini fell down slightly, while the Centennial Eureka regulates its output by the needs its smelter at Bingham Junction. smeller at Bingnam Junction. The shippers and amounts were: Ajax, 3 carloads: Beck Tunnel, 5; Black Jack, 7; Bullion Beck, 8; Carisa, 8; Centennial Eureka, 33; Dragon Iron, 8; Eagle & Blue Bell, 3; Eureka Hill leasers, 14; Gemini, 5; Grand Central, 6; Godiva concentrates, 2; Mammoth, 4; May Day, 1; Ridge & Valley, 3; Scranton, 4; South Swansea, 1; Swansea, 3; Uncla Sam, 2; Victoria, 6; Yankee Consoltdated, 4: total, 130.

Drifting is being done south of the shaft at the Snowflake mine, on the 1.000-foot level, with very encourag-ing results. Over 700 feet of drifting has been done on the 1,000-foot level.

AN OLD LANDMARK.

Heinze Smelter at Meaderville Goes Out of Commission Today.

The days of the old Heinze plant in i Meaderville are numbered, and the number is not long. Three days hence, says the Annoonda Standard, or at the end of the month, shipments of ore made the statement that in December.

smelter in Anaconda will get that rock which would go to the old Heinze plant had the Butte Coalition company, has owned it since the sale of the Heinze possessions, Feb. 1, not decided to close it down for all time to come and dismantle it. Although snipments will cease at the time stated, some time will clapse before the work of smelting is entirely finished, for there will be some ore on hand to treat, and the job of cleaning up is not one that can be accomplished in a day. As soon as everything is out of the way the plant will be dismantled and the bats and ways can treat on the above of the day.

owls can roost on the ghost of the old structure it they desire so to do. The smelter has been practically "off" for some time. Its equipment in operation at present consists of two blast furnaces, two reverberatories and two converters. It has no concentrator, t the ere is concentrated in the plant of the Basin Reduction company in Basin. It has been going there since the destruction of the old concentrator in Meaderville by fire about four years ago. This ore comprises the output of the Cora, Rarus, Minnie Healey and Belmont mines of the Red Metal company and a portion of the output of the Laxington mines, owned by La France Copper, together with some custom pro-

Just what bearing the closing of the old smeiter of the Montana Ore Purchasing company, or United Copper, will have on the Basin concentrator is not generally known. Without ore not much can be accomplished in the latter, and without mines to supply ore it is likely that the plant will have little to do until the Lexington or other mines are in shape to give it work. The presficient even to amuse the Basin concen-trator wheels, for the plant is a large one and can handle 1,500 tons of ore a y. Eventually the Lexington will be shape to give the plant something to do. The average daily production of the La France for the year ended June 1 was 90% tons a day, and a portion of this went to the plant of the Montana Zine company. The smelter was built by

Heinze about 14 years ago, and with the exception of short periods has been built it was small, but as the mines from which it derived its supply of ore developed, Mr. Heinze gradually in-creased its capacity until it became a factor in smelting circles. Improve-ments were made in it as late as last It has always been a pretty good smoke and is still going some in this

With this plant closed there will be only one smelter in operation in Butte, the reduction works of W. A. Clark, which have been provided with a stack that carries the fumes so high in the air that even the apex of the main range of the Rocky mountains east of the city frequently escapes the effects

A working crew at the old plant com-prises between 200 and 300 men. The plant is in charge of Harry F. Charles, ho has been there several years. Mr. Charles knows every nook and corner in it, and also understands its mechanism thoroughly

HAILEY CONSOLIDATION.

Idaho Consolidated Takes in Minnie Moore and Queen of Hills.

Word comes from Hailey, Idaho, to the effect that a consolidation of three of the biggest mines in the Wood river country had been effected. Minnie Moore and Queen of the mines have been taken in by the Idaho Consolidated. It is planned to open the mines upon an extensive scale and provide great mill facilities for the

BINGHAM GROUP TROUBLE. Employes Unable to Collect Money Due Them for Wages,

It was learned today that the suit instituted yesterday against the Bing-ham Group Mining company for something over \$30,000 to recover on ceronly after the notes, sent east for col lection, had been returned with the encompany had no funds with which to the obligation.

The Bingham Press of yesterday con-tains the information that the company has allowed its pay roll to go by default and says:

"The men who have been employed by the company which owns the Bing-hem Group were greatly surprised last week when they presented their time checks for payment and found that the company was out of funds and the had donated their work unknowingly in order that the directors and stockholders in Boston could spend a summer vacation in the country.

"One of the Boston managers of the company is in camp and gave as the excuse for not being able to raise the all out of town on a vacation and could not be communicated with regarding the affair, but that has been two weeks

"The company has been shipping pay ore up to the last shipment, which did not bring the required amount to pay running expenses. Any one of the group of claims is worth 10 times the amount of what the company's indebt-edness has reached for employes, and if they are not already covered with mortgages could be disposed of if they were anxious to pay the time checks.
"The men will lose about \$1,000, whi is no little sum for laborers to be beat

A RECORD MONTH. Utah Consolidated Has Done Itself

June will close as a record breaker for the Utah Consolidated of Bingham in the way of production of copper, While of course it will be days before Manager Channing knows the exact output, the daily record sub-mitted to him from the smelter, shows that the present month will exceed all others by considerable. It is safe o, say the Utah Consolidated will end

Proud This June.

the month with having turned out ap-proximately 2,000,000 pounds of metal. TONOPAH DIVIDENDS. Directors Have Ordered Payment of

\$350,000 on July 21. A message receved over the Pollock wires today announced that the direc-tors of the Tonopah Mining company had held a meeting in Philadelphia dur-ing the day and that in addition to posting the regular quarterly dividend of 25 cents a share, or \$250,000, an extra 10 cents a share, or \$100,000, had been ordered for payment on July 21. The books of the company close on July

MAY BECOME MANAGER.

Sidney Bamberger has been tendered he position of manager of the West Columbus Copper company, which is about to be organized to develop the Silver Dipper and other claims in Alta, but he has not fully decided to accept, although it is probable he will do so.

He visited the property yesterday in company with his cousin, Joseph J.

Ramberger, and suggested certain lines work which will undoubtedly be cared out. He recommended the running f a tunnel, and believes there is a show for a mine, with proper develop-

ABOUT BALAKLALLA What Captain MacVichie Says About

California Producer.

Captain Duncan MacVichie, general manager, and H. N. Sweet, secretary and treasurer, of the Bingham Consolidated Mining & Smelting company, are expected in from California tomor-row, where they have been making an inspection of the Balaklalla properties, and in which they are interested. Cap-tain MacVichie, who is the chief engi-neer of the Balaklalla company, has made the statement that in Factoria.

1905, there was nearly 2,000,000 tons of ore blocked out, showing small values in silver and gold and about 2 per

Mr. MacVichie estimates that on a 121/2 cent market there will be a profit on this ore of \$4,289,000, and with cop-per at 15 cents, \$6,860,000, "When properly equipped," he is quoted as saying, "the Balaklalla will be capable of producing 1,000 tons per day of profit pay-

ing ore."
In Boston during the past week Bal-aklalla shares have been quoted around

RETURNS FROM IDAHO.

M. M. Johnson, of the staff of Samuel Newhouse, has returned from a trip to Silver City, Idaho, where he went for the purpose of making an examination of a property upon which Mr. Newhouse recently secured a bond. He came in with a big bag of samples, which were turned over to the assayer, and upon returns hinges the fate of the ported receipts of 285 cars.

The corn market was easier on liberal receipts and good weather. September opened unchanged to ½ lower at 52½ to 52½ and declined to 52.

Trading was very light in the cats pit. September opened ½ to ¼ lower at 38½ to 33½ and sold at 35½ 336½.

Provisions were quiet and steady. The market for live hogs was firm. September pork opened 5 cents higher at 16.75; lard was up 2½ at 8.27½. Ribs were 2½ 35 high er at 9.25.

The close was weak with Section 1.

At Silver City, Mr. Johnson, says, several mines are operated, which, of course, includes the Trade Dollar.

CONCENTRATES.

Samuel Newhouse will leave for the

Edward McCarrick has returned from fairview. Nevada, where he has been ooking after mining interests.

Secretary Lambourne of the Daly Judge Mining company went to Park City this morning on one of his regular nspection trips.

The ore and bullion settlements re-corted late yesterday by McCornick & co. were: Crude ore and concentrate, \$28,000; base bullion, \$45,000; gold bullion, \$7,800. The initial shipment of ore from

the Nevada Hills mine at Fairview, Nev., which was released from the sampler yesterday showed an average value of \$209 to the ton. An official of the Thompson mine at Park City says it will probably be some time yet before the company decides to resume development work.

Something may be done, however, in the fall. Word has been received from Stratford, the new camp near Lodi, to the effect that the place is having quite a stampede. The country has been lo-cated for several miles all around the

strike and a considerable number of men are at work in the district.— Goldfield Sun. One hundred De Forest Wireless stock at \$3.00 Must be sold at once, so give us a bid, E. M. West & Co., Tel. 165. 327 D. F. Walker block.

NO ANIMATION IN STOCK MARKET

Prominent Leaders at the Opening Showed Some Scattering Gains.

BULL EFFORTS OVERCOME.

Bears Covered Too Soon, Bank Statement Being Disappointing-

Closing Irregular.

the stock market today there was a sprinkling of gains amongst the promi ent market leaders which showed effort to support the market. There were free offerings at other quarters of the list, however, causing sharp declines. Great Northern preferred fell 2. Canadian Paific 1%. Atlantic Coast Line, Hide and Leather preferred and Anaconda a point and Pennsylvania Reading, Atchison and American Ice large fractions, Virginia Iron sold at a decline of 314 and Chicago Terminal preferred at an advance of 2

Selling orders swept away the feeble

esistance of the bulls and prices dipped sharply. Only a few of the prominen stocks, however, sold below the level of yesterday. United States Steel and Reading established low records for the movement of M's and 12 respectively. After the forced selling orders had been disposed of the market railled feverishly. Some stocks sold above yesterday's closing, St. Paul and Northern Pacine gaining a point and Anaconda 2. The market was on the down grade at 11 o'clock. Bears covered some snort lines in anticipation of the bank statement but that document proved disapointing in the small contractions in loans and prices sold off to the lowest of the day. Pennsylvania, New York Central, Reading, United States Steel preferred and Amalgamated Copper were prominent New York Central deading 1%. Amalgamated Copper Ware prominent New York Central deading 1%. Amalgamated Copper 1% and St. Paul and United States Steel preferred 1. The Minneapolis, St. Paul and Sault Ste Marie stocks lost 2. Northwestern 2. Atlantic Coast Line 1%. Aichison 1%. Wells-Pargo 5. Tennessee Coal 4 and others a point. Short covering again caused railes which reached one in a few prominent stocks. The raily was well held in most cases, but the closing was irregular. ment of 12% and 121 respectively. After
